

Development Implementation
North Logan City, Utah

Strategy 5 is assisting this Northern Utah community with implementation of its City Center Plan which calls for creation of an entire downtown where none exists today. The project has come to include a Hilton Garden Inn and Conference Center (a development partner which Strategy 5 attracted), and approximately 1 million square feet of mixed-use retail, restaurants, entertainment, office and residential components. Strategy 5 is working with both horizontal and vertical development companies to move the implementation plan forward. Ground-breaking for the hotel is anticipated for Spring 2008
